AngularJS Expressions vs JavaScript Expressions

18
Jul
2015

AngularJS binds data to HTML using **Expressions**.

Angular expressions are like JavaScript expressions with the following differences:

AngularJS Expressions vs. JavaScript Expressions

Like JavaScript expressions, AngularJS expressions can contain literals, operators, and variables.

Unlike JavaScript expressions, AngularJS expressions can be written inside HTML.

Unlike JavaScript expressions, AngularJS expressions do not support conditionals, loops, or exceptions.

Unlike JavaScript expressions, AngularJS expressions support filters.
